1. Imaging mass spectrometry (IMS) for authentication of precious Chinese medicines 成像質譜於鑒定珍貴中藥的使用

—原理—

- ◆ 利用 Matrix-assisted laser desorption/ionization time-of-flight mass spectrometer (MALDI-TOF MS) 質譜儀於樣本一些特定的點上施加激光直至完全掃描整個樣本表面並於個定點收集質譜
- ◆ 在這些收集得來的質譜中提取離子信號，根據其信號強度及空間分佈用顏色通過軟件建立離子圖像
- ◆ 在離子圖像中，離子於樣本某個位置的信號越強，會用越深的顏色顯示

Autophagy fights disease through cellular self-digestion 通過細胞自噬抵抗疾病

Noboru Mizushima¹, Beth Levine², Ana Maria Cuervo³ & Daniel J. Klionsky⁴

[Top](#)

Autophagy, or cellular self-digestion, is a cellular pathway involved in protein and organelle degradation, with an astonishing number of connections to human disease and physiology. For example, autophagic dysfunction is associated with cancer, neurodegeneration, microbial infection and ageing. Paradoxically, although autophagy is primarily a protective process for the cell, it can also play a role in cell death. Understanding autophagy may ultimately allow scientists and clinicians to harness this process for the purpose of improving human health.
